

REMARKS

We make reference to the Examiner's summary of the election requirements as set out on page 3 of the Office Action where it is stated "The claims are deemed to correspond to the species listed above in the following manner:

Claims 7-15 and 18-22 correspond to the first election of species requirement, and claims 26-28 correspond to the second election of species requirement. Claims 1-6, 16-17, 23-25, and 29-43 are generic."

Responsive to the first election of species we are required to elect a species of the adhesion promoter. We hereby elect "low molecular weight amines". This species reads on or is encompassed by claim 1, claim 2, claim 4, claim 5, claim 6, claim 7, claim 10, claim 11, claim 23, claim 24 and claims 25-43.

In response to the requirement for election of a second species where we are required to elect a species of solvent we hereby elect "ester based solvents" as recited in original claim 26.

Ester based solvents read on or are encompassed by claims 1-25, claim 26, claim 27 (part only) and claims 29-43.

The Examiner is kindly requested to note that in making this election of species it is difficult to separately elect a specific adhesion promoter and solvent as the two entities are linked, i.e. the selection of the adhesion promoter is based on the selection of the solvent and vice versa.

Response dated August 18, 2010
